Soumya Mukherjee

Hooghly, West Bengal| 8101750869 | soumyaa368@gmail.com | www.linkedin.com/in/soumyaamukherjee

OBJECTIVE

Mechanical Engineering undergraduate eager to gain hands-on experience in advanced manufacturing processes, with a strong desire to explore additive manufacturing and Industry 4.0 technologies. Skilled in 3D modeling, CAD, and simulation tools such as SolidWorks, Fusion 360, ANSYS, and MSC ADAMS. Interested in Robotics, IoT, and smart manufacturing systems, with a focus on applying engineering knowledge to deliver innovative solutions.

EDUCATION

Kalinga Institute of Industrial Technology **Bhubaneswar,Odisha**

B.Tech Mechanical Engineering CGPA-8.72 *Graduation Date: Jul 2027*

Memari Crystal Model School **Memari,West Bengal**

Higher Secondary (Class 12) *Passing Date: May 2023*

Science-CBSE-76%

PROJECTS

- SAMUKA-Design, fabrication and simulation of autonomous under water vehicle. In this project I have used solidworks to design the AUV and used ANSYS to simulate its behavior underwater and calculated various factors that influence the performance of the bot underwater. I have used various non-conventional manufacturing processes like 3d-printing (FDM), CNC routing to fabricate the physical model.
- **IoT-based Regenerative Braking System** – Designed and implemented an IoT-enabled braking system using Arduino, improving energy recovery efficiency by 15%.
- **Rocker Bogie Mechanism (IoT-integrated)** – Developed a six-wheel rover prototype with IoT modules for all-terrain navigation.
- **IoT-based Water Level Monitoring** – Built a real-time sensor system for automated pump operation, eliminating the need for manual monitoring.
- **Sand Rover vehicle**–Designed and fabricated a rover capable of navigating sandy terrain, applying mechanics, CAD design, and kinematics.

TRAINING EXPERIENCE

Metal and Steel Factory Ishapore **Ishapore,West Bengal**

Vocational Trainee *May 2025 - May 2025*

- Introduced to industry work culture and safety practices
- Assisted in machining, welding, and material inspection tasks.
- Gained hands-on exposure to machining, welding, material testing, and quality inspection processes.
- Contributed to 10+ production trials, improving familiarity with manufacturing processes and quality inspection standards.

SKILLS & INTERESTS

Skills: Microsoft Office (Excel, Word, PowerPoint)

Computer-Aided Design (CAD) and 3D Modeling & Assemblies : Solidworks,Fusion 360. Simulation : MSC ADAMS,Ansys.

Engineering Knowledge**:** Manufacturing Processes, CNC Machining, Material Testing.

Achievements-

1)Special mention in Autodesk Skill Surge Competition 2025
2)Finalist Gujrat Robofest 2025-India's largest robotics competition.
3) Awardee- Mohan T-advani Scholarship By BlueStar Company
